

**Name** WINDSOR ROAD UPGRADE  
**Client** Roads and Traffic Authority of NSW

**Project Description** Daracon was engaged to construct 3.7km of 4 lane road, stormwater drainage, electrical services and public utilities such as power, telephone and water.

**Site Location** Vineyard

**Value** \$24.6 million

**Duration** 18 months completed May 2006

**Referees** Kevin Hays - 02 8814 2398

**Key Personnel** Paul Roumanos – Divisional Manager  
Neil Kuberan - Project Manager  
Brett Bondfield – Project Engineer  
Wayne Spinks – Superintendent

## Significant Achievements

- Detailed traffic switches were done often to provide for minimum impacts on 50,000+ ADT volume and maintaining safety of those working on site.
- 25,000m<sup>2</sup> of lean mix sub base 240mm thick was successfully hand placed by subcontractors De Martin Gasparini and achieved the tight time, cost and quality requirements of the specifications.
- Several heritage boundary stones circa 1825 were identified along the route, were protected then carefully relocated.
- Two large water mains (900mm and 500mm dia.) were re-laid across the site without incident or disruption.
