

Name

BAYSWATER RAIL LOOP

Client

Barclay Mowlem Constructions Limited

Project Description

A new rail loop was constructed to allow safe and smooth loading operations within the coal mine. Daracon supplied heavy earthmoving equipment that was prepared to coal mining standards.

Machines included:

- D9 Dozer
- 631 Scrapers
- Excavator (35 Tonne to 20 Tonne)
- Compactors
- Graders

Site Location

Bayswater Coal Mine, Hunter Valley

Value

\$2.1 million

Duration

4 months

Referees

Brian Patterson - 0438 826 664

Key Personnel

Significant Achievements

Extent of Involvement & Role of Proponent (S)

Hourly Hire

- Barclay Mowlem required all plant items to have proven reliability and presentation
- Operators were given a 6 hour site induction to completely familiarise them with site conditions and procedures
- Environmental issues were rigorously enforced on site
- Special attention was given to the presentation of machines to ensure there were no oil leaks or excessive noise emissions.
- Daracon's operators carried out daily inspections of their machines to make sure that they maintained the required standard and continued to perform reliably

Daracon's provided the necessary machinery and operators on an hourly hire basis. Barclay Mowlem were the principle contractor.
